PROFESSIONAL SUMMARY

Senior software developer with extensive experience in Xamarin, React Native, and cross-platform mobile development

Proven expertise in designing, implementing, and maintaining scalable software solutions, with a focus on architecture, UX, performance optimization, and leadership.

Strong background in MVVM, SOLID principles, and cloud integration.

TECHNICAL SKILLS

- **Mobile Development:** Xamarin.Forms, Ionic, React Native, Swift, Kotlin, Objective-C
- **Web & Backend:** Angular, C#, SQL, RESTful APIs
- **Software Architecture:** MVVM, MVC, SOLID, Dependency Injection, Serverless Architecture
- **Tools & Platforms:** Git, Azure, Firebase, Jira, Agile, SCRUM
- **AI-Assisted Development:** Experience with AI-powered tools for code optimization and problem-solving

WORK EXPERIENCE

Senior Software Developer | Riaktr

June 2023 – Present

- Leading development and architecture decisions for mobile applications.
- Optimizing performance and maintaining high code quality standards.

Senior Software Developer | Mera

September 2021 – May 2023

- Developed and maintained large-scale applications with Xamarin.Forms.
- Implemented performance improvements and code refactoring strategies.

Lead Developer & Team Co-Lead | aucobo GmbH

June 2020 – September 2021

- Led the development of a cross-platform smartwatch app for industrial coordination.
- Managed team goals, OKRs, and best practices to improve efficiency.

Lead Developer | QCerris

March 2019 – May 2020

- Architected and developed an iOS shipment tracking solution in Swift.
- Led a team of developers and mentored junior engineers.

Software Developer | ShowingTime

September 2017 – March 2019

- Built a real estate market app for Android, iOS, and Web using Xamarin & Ionic.
- Developed reusable components and frameworks for efficiency.

Software Developer | Asseco-See

July 2015 – June 2017

- Designed and developed banking applications for mobile platforms.
- Implemented security features such as OTP generation and authentication.

KEY PROJECTS

- [GT and GT+ Mobile Apps](#) (2023 - Present)

- Developing a mobile application for Riaktr's Sales and Distribution (SnD) platform.
- Enhancing telecom sales and distribution operations through advanced mobile solutions.

- [EY Navigate](#) (2021 - 2023)

- Financial management app with integrated web elements and advanced calculations.

- [aucobo](#) smartwatch app (2020 - 2021)

- Smartwatch app for industrial workflow coordination.

- [Project44 DriveView](#) (2019 - 2020)

- Shipment tracking with geofencing and push notifications.

- [Mobile Banking Apps](#) (2015 - 2017)

- Banking solutions with security features, money transfers, and notifications.

EDUCATION

School of Electrical Engineering, University of Belgrade

- Course: Computer & Information Sciences

LANGUAGES

- Serbian, English – Fluent
- German, Spanish – Basic
